**ENERGY SECTOR**

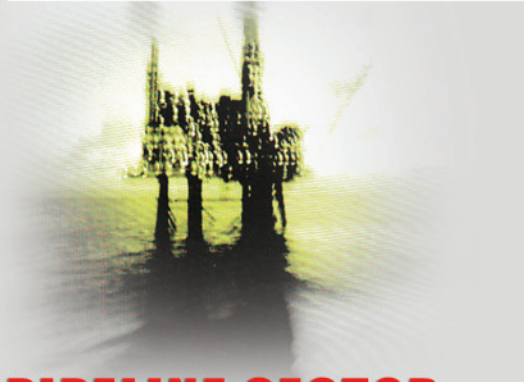

**PIPELINE SECTOR**

**CHEMICAL SECTOR**

**ECOLOGICAL SECTOR**

## ENERGY SECTOR

Designing and execution of (waterproof and in ADPE execution) thermoelectric and hydroelectric systems.

## PIPELINE SECTOR

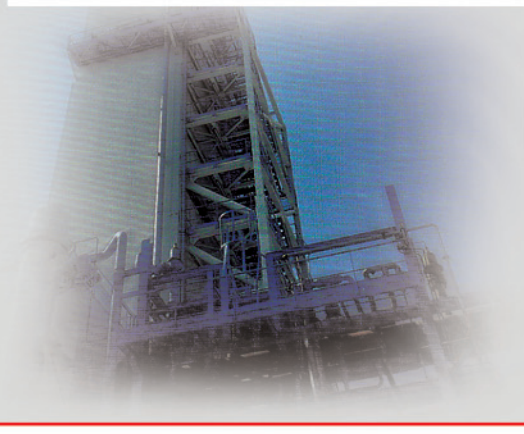

Design and realisation of electrical and instrumental monitoring systems for the interception of methane pipelines.

## CHEMICAL SECTOR

Design and realisation of explosion proof systems in execution, characterised by the presence of harmful substances, for which the construction and maintenance requires maximum reliability and experience.

## ECOLOGICAL SECTOR

Design and execution of electrical and instrumental installations for CDR production systems, waste disposal systems, smoke and sludge treatment systems, maintenance of the measurement instruments and the process utilised in the systems for water treatment.
